Personal Summary

From writing the first line of code to deploying the site on the Internet, I took everything as an opportunity to learn something new and it was also very fun. I enjoy writing code and choosing programming as a career.

Skills

- **Technical**
  React | SCSS | Git | Node | HTML 5 | Javascript | CSS 3 | ES6 | Photoshop | Adobe XD
- **Interpersonal**
  Team Leadership | Coordination | Decision Making | Problem Solving

---

Projects

- **React Real Time Chat App** 🔗

  Chat app made using **React** and **Firebase** where I have used **React Hooks** for fast load, unload, update of the page components.

- **React Sudoku App** 🔗

  A classical sudoku game built entirely on the **React** using **React Hooks**, **SCSS**. Also used the **React Router API** to browse through different components like (rate, scores etc), used the **Local Storage Object** for (history, undo, redo functionality).

- **React Calculator App** 🔗

  A **React** based online calculator built using the **React Hooks** and used **Session Storage Object** as a storage for the history of the calculator's evaluated expressions.

- **Landing Page** 🔗

  A product landing page using vanilla JavaScript, HTML and CSS.

Education

- **FreeCodeCamp** (2020) - *Web Technologies and Programming*

Interest & Hobbies
